

Mac's SA114 Semi Automatic Rising Bollard

The SA114 semi automatic bollard is our new commercial and residential bollard, and combines a stylish look and finish with the protection expected from a Mac's product. Through continuing research and development, we are able to offer high quality protection for driveways and commercial premises at an affordable price, meaning no matter what the application there will be a product that suits your requirements.

The SA 114 works in the same way as other semi automatic bollards, with lifting by the way of a key released gas actuator raising the bollard and locking it into place.
